Sentier des toits

Dear visitors ! In order to discover our vine-growing village, its strategic position along the Fecht river at the entrance to the Munster valley, take the walkway overlooking the village roofs !

This walkway starts and finishes at the Munster gate. Along the "Kappelengraben" taking you to the Brand gate you will discover the fortifications of the town. This gate, the ramparts and moats witnessed Marshal Turenne's soldiers fighting the Imperial troops from beyond the Rhine. As you are going higher you will have a view over the town's roofs and the location of its factories. At the top of the steps a notice will inform you about the course of the water, a precious resource for agriculture and factories.

Just follow the signs; the tour will take you about an hour.
